PROFESSIONAL SUMMARY

Entry-level Data Science and Machine Learning enthusiast with hands-on experience in exploratory data analysis (EDA), advanced feature engineering, and predictive modeling. Proficient in Python, SQL, and Scikit-learn, with a proven track record of building end-to-end ML pipelines, evaluating performance using statistical metrics, and deploying models. Actively seeking Data Science or Machine Learning internship roles to solve real-world business problems.

PROFESSIONAL EXPERIENCE

Machine Learning & Data Science Intern

EduSkills (AICTE Virtual Internship Program).
Jan 2026 – Mar 2026

- Completed an intensive 10-week structured program focused on data science workflows, model optimization, and deployment.
- Implemented Natural Language Processing (NLP) techniques, including text tokenization and preprocessing, utilizing Naive Bayes for classification tasks.
- Designed interactive Power BI dashboards to translate complex model outputs into actionable business data stories.
- Integrated Python scripts with MySQL databases to streamline relational database workflows and backend data management.

PROJECTS

Capstone Project: E-Commerce Customer Sentiment Analysis

- Built an end-to-end text classification framework to categorize consumer reviews.
- Engineered a SQL data pipeline and deployed real-time predictions via a Flask API.
- Designed a Power BI dashboard to visualize trends and pinpoint customer dissatisfaction.

CardioVision AI: End-to-End Heart Disease Predictor

- Engineered a production-ready, modular ML pipeline for structured clinical data analysis.
- Tuned a classification model using 13 medical parameters to achieve 88.89% accuracy.
- Deployed an interactive full-stack application live on Render featuring real-time risk reporting.

House Price Prediction Pipeline

- Developed an ML regression pipeline with missing value imputation and feature scaling.
- Evaluated models via cross-validation; selected Random Forest Regressor ($R^2 = 0.76$).

EDUCATION

RTMN University.
2023 - 2027

Bachelor of Engineering (B.E.) in Electronics and Communication | Nagpur
University Expected Graduation: 2027 | 8.90 CGPA

TECHNICAL SKILLS

Python · C · C++ · SQL · MySQL · NumPy · Pandas · Scikit-learn · Pytorch · Matplotlib · Seaborn · Flask · EDA · Data Cleaning · Feature Engineering · Supervised Learning · Cluster Analysis · Ensemble Methods · Cross-Validation · Text Preprocessing (NLP) · Power BI · MS Excel · Jupyter Notebook · VS Code · Statistical Analysis · Data Visualization · Model Evaluation Metrics

CERTIFICATIONS

Intermediate Machine Learning – Kaggle

Focused on data leakage prevention, advanced categorical encoding, and XGBoost models.

Artificial Intelligence Fundamentals – IBM

Covered foundational concepts of AI, machine learning pipelines, and deep learning architectures.

Cloud Computing and Distributed Systems – NPTEL

Comprehensive training in virtualization, cloud storage, resource management, and architecture
